

CALIBRATION KIT (COMBUSTIBLE) MODEL TOXCOMCALKIT

GENERAL DESCRIPTION:

The **TOXCOMCALKIT** is the calibration kit designed specifically for use with the TOX-COMB/ANA combustible sensor, used in conjunction with Tox-Control or TOX-4/ANA ventilation control systems. The kit consists of two tanks of calibration gas, which contain the proper concentrations of methane and air zero needed for proper calibration. The required hardware and fittings are included to provide correct gas volume and metering. The kit also contains complete instructions and an industrial grade carrying case.

The kit has enough gas for approximately 40 calibrations.

FEATURES:

- Tank of Standard Span Gas (17 Liter)
- Tank of Air Zero Gas (17 Liter)
- Regulator/Pressure Gauge
- Sensor Calibration Adapter With Tubing
- On/Off Valve
- Adjustment Screwdriver
- Carrying Case
- Complete Set-Up and Calibration Instructions

(Please refer to applicable data sheets or instruction manuals for calibration procedures)

ORDERING INFORMATION:

If a calibration kit is needed for a TOX-COMB/ANA sensor, contact your local Toxalert representative or contact Toxalert directly for information on ordering TOXCOMCALKIT. Please verify the system model and serial number if ordering for a unit already in operation.
